When you hire **Aero Geometrics**, you not only get professional geomatics expertise, you get quality results that are priced competitively. We work hard to create lasting relationships by providing your organization with complete and accurate geomatics services.

- **Consultation expertise and customization of project scope and specifications**, achieving client objectives for accuracy, delivery and cost.
- **Extensive working partnerships and industry contacts**, ensuring our clients a complete solution for all of their projects at competitive pricing.
- **Exclusive client ownership** of all materials and deliverables associated with your project.
- **Guaranteed confidentiality.**
- **State-of-the-art technology** and the capacity to efficiently complete any sized project within rigidly defined delivery schedules.
- **Over 30 years of attention to detail and an overriding principle of quality** are your guarantee of complete satisfaction. Our many clients will attest to this claim (see the back of this brochure for a list of recently completed projects). References are available upon request.
